

Healthy, Secure, Protected

Computer systems are mission-critical in today's workplace. When the network is down, productivity ceases. Cabezon Group can help your organization with IT staffing to ensure your systems are healthy, secure and protected.

Business leaders know a significant investment must be made to maintain and support IT environments in the workplace. We have the expertise and proven methodologies to design, deploy, and operate complex IT infrastructures. We have experience maintaining a wide range of information management resources including hardware, software, secure networks and wireless devices.

We provide the following infrastructure and systems management services:

Cabezon Group can help **protect and secure your network** by providing:

- Network design and engineering
- Help desk and desktop support
- IT security and infrastructure protection
- Wireless device deployment and support
- Messaging and collaboration
- Audio/Visual support

Network design and engineering

Optimal network performance is the result of proper design that is well documented and includes managed processes and procedures. Cabezon Group can help design your network to be secure and efficient, functioning at a high level, while minimizing overall costs. Our network specialists can also perform network assessments and implement measures that enhance your business environment.

Help desk and desktop support

Computers need maintenance and end-users need answers to common IT-related questions. Cabezon Group can provide experienced help desk technicians to ensure your IT operations remain functional, with timely responses reducing down time.

IT security and infrastructure protection

Cabezon Group can provide IT security experts to ensure your IT environment is protected against threats such as malware, viruses and spam. We also have the expertise to set up sound security policies that ensure users are granted the appropriate rights for computers, networks and directories.

Wireless device deployment and support

Mobile devices such as smart phones, iPhones® and BlackBerries® are commonplace in today's workplace. Employees expect these devices to connect to company systems, with mobile e-mail and wireless Internet access enabling business to be done virtually anywhere. Cabezon Group has mobile experts who can help plan, design, implement and support mobile solutions in your work environment.

Messaging and collaboration

Collaborative applications are becoming pervasive in today's top performing companies. Employees need mechanisms for sharing files and ideas as well as working in common area workspaces. Cabezon Group has the expertise to plan, install and train your employees on the latest collaboration applications such as Microsoft SharePoint, Exchange and Office Communicator.

Audio/Visual support

Great meetings leverage technology to facilitate and present ideas. From internal meetings to customer sales presentation, Cabezon Group can ensure your audio/visual equipment is ready to go and functioning as expected.

Cabezon Group is a certified Microsoft reseller of the following products:

- Hosted Exchange 2007
- Hosted SharePoint
- Hosted Live Meeting
- Microsoft Business Productivity Suite (BPOS)

Highlighted Engagement

Federal Emergency Management Agency (FEMA) Assistance to Firefighters Grant (AFG) Program

The AFG Program awards one-year grants directly to fire departments and nonaffiliated emergency medical services (EMS) organizations to enhance their abilities with respect to fire and fire-related hazards. A total of \$2.75 billion in grants have been awarded since the program's inception, and the program receives an average of 25,000 applications a year. Cabezon Group provides system administration services in multiple areas of this program, including field and office staff support. Cabezon Group works closely with the program staff to build, manage and support multiple internal systems critical to the successful operation of the grant program. These systems manage applications, scoring systems, workshops and other logistical applications.
